

FIRST ASSIGNMENT
(第一个作业)

The assignment (part I)

Describe a **task** that **can be performed faster** using multiple computers.

(the example should be different from those given by the professor

- e.g. **not about cooking!**).

The task should be related to **sports** or **entertainment**.

Explain why the task can be performed faster.

The assignment (part 2)

Draw a workflow for this task.

To draw the workflow, please use the graphical notation that I have explained last week in the PPT.

The **workflow** must:

- contain at least 12 boxes and 12 arrows.
- It must contain at least one OR, one XOR and one AND.
