SECOND ASSIGNMENT (第二个作业）

Assignment

The second assignment:

- will be graded on **15 points.**

- must be submitted no later than the **30th October at 11:59 PM.**

- must be done by yourself

   (not a team work)

Task

- This course is an introduction to *what is cloud computing*.

- I have explained that *the cloud* is <u>different</u> from *a single computer*.

- This is true from many point of views (how data is stored, how cloud applications are developed, how to use a computer/cloud, etc.).

- <u>**Task**</u>: You will write a report that will explain the **main differences** between the **cloud** and a **single computer**.

Task (continued)

- The report is a **Microsoft Word file** that is no longer than <u>two pages,</u> using the default format (*do not change the text size or other document properties to put more text!*).

- The **file** must be named: **STUDENTID.doc**
- Your report must be written in **English**.
- However, you can add some short explanations in **Chinese** if you want.

Evaluation criteria

Reports will be evaluated using the following criteria:

- The text shows that you have understood the main differences between the cloud and a single computer.

- The text is a summary.

- The text is accurate.

- You explain using your own words (you do not just copy the text from the PPTs).

Evaluation criteria

Important:

- If a student **plagiarizes** the work of another student, all students will receive the grade **0**.

- If a student copies content from the Web, they will receive the grade **0**.

- If a student submit his work **after the deadline** he may also receive the grade **0** (except for exceptional cases).
